MULCHERS/GRAPPLES

ROTARY BRUSH MULCHERS with the industry's widest range of models for low flow, standard flow, and high flow systems. Models also available for walk behind skid steers and mini excavators. Available models: 42", 48", 60", 66", 72", 78" and 90". Cutting capacities from 2" to 12".

Over 15 years experience building brush cutters with exclusive features that set Brush Wolf cutters above the rest.

7201B OPEN FRONT BRUSH CUTTER allows you to cut on the move. Closed front cutters require you to stop when you come to heavy brush or saplings, lift the cutter up and lower it onto the material for cutting. Using a brush cutter that can cut through heavy brush without stopping saves time and money.

X SERIES EXCAVATOR MODELS are powerful brush cutters that can handle the most demanding jobs cutting through dense forest and thick brush. Brush Wolf's industry-leading excavator-mounted brush cutters allow you to cut brush in areas that a skid steer can't go, such as riverbanks, lakeshores, swampy areas and hillsides.
