SKID STEER WHEELS

The EWRS series of Non-Pneumatic tires were designed to meet the needs of today's jobsite demands. They offer you serviceability, traction and a comfortable ride.

With serviceable tire sections the need for a service truck and specialized technicians is all but eliminated. The only service tool you need is a 3/4" wrench.

The EWRS series feature the largest tread lugs in the industry for serious traction and a long wear life. The reduced number of lugs on a tire allows an increase in the lug width and height and gets rid of the wear bars running through the center of any other tire you're going to see on the market. This allows two things, large voids in our tread pattern allowing for unmatched material cleanout and a long wear life on a bigger lug.
