SB5QDM Quick Attach Snow Blade Mount

The HLA Quick Attach Snow Blade Mount is securely connected to both the front and rear of your tractor. Relying on the rear of the mount, the force is pushed through the drawbar from the front of the mount providing incredible pushing strength. With parallel linkage, you can rest assured that the blade will always remain parallel to the ground whether it's raised for stacking snow or at full angle.

The quick release design relies on front and rear adapter brackets fitted to the tractor chassis. With the hydraulics connected, down pressure on the blade allows you to raise the undermount aligning it with the front bracket. Once engaged reversing the pressure raises the rear of the undermount locking it into the rear bracket.

Available for most makes, the undercarriage mount includes all hardware, hose kits and electro - hydraulic wire kit allowing for easy installation.
